

■ Ai-Socket (ASK) White Paper ■

Plug Into the Future of Culture, AI, and Crypto

1. Introduction

The meme coin market is crowded, with thousands of tokens appearing every day. Most vanish just as quickly.

Ai-Socket (ASK) is different. Like a socket powering everything it touches, Ai-Socket fuels a current of memes, AI, and community — sparking connection and purpose across the blockchain.

2. The Narrative

Ai-Socket began with a simple vision:

- To be the universal meme plug — a token that anyone, anywhere can connect to.
- To represent AI-driven culture on the blockchain.
- To show that memes are more than entertainment — they are the energy that keeps crypto alive.

This is more than a coin. It's the spark, the plug, the connection point to the meme future.

3. Purpose

Ai-Socket is about fun and impact:

- Fun & Energy: A meme coin designed for trading, humor, and community spirit.
- Interactive Play: A Telegram “Spin-to-Win” game launched in Phase 1 brings excitement and rewards directly into the community.
- ♥■ Education First: 50% of supply is dedicated to education initiatives, empowering kids with access to AI tools, technology, and learning.
- DAO Governance: All education fund allocations are decided by community vote, ensuring transparency and fairness.
- Community Power: With broad distribution and minimal private control, Ai-Socket is built for fairness and growth.

4. Tokenomics

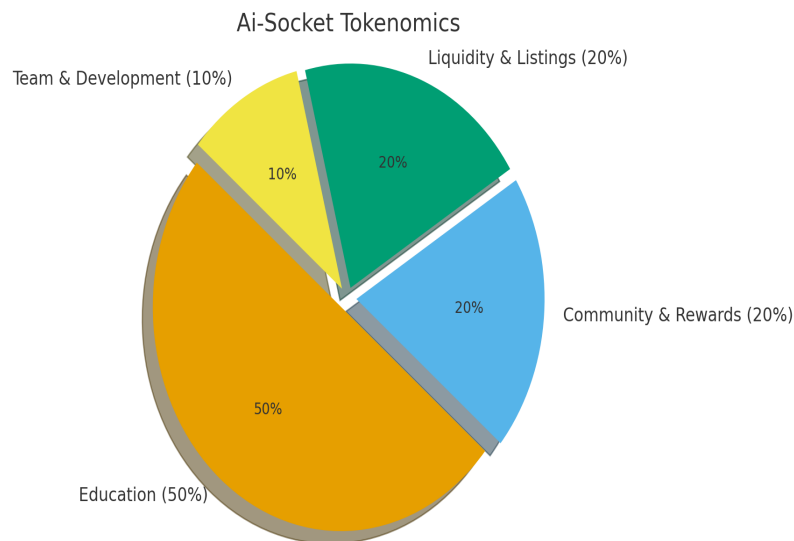

Total Supply: 1,000,000,000 ASK

Unlike traditional projects, Ai-Socket did not pre-allocate giant insider bags. Only 10,000,000 ASK (1%) was privately held at launch. The rest entered the market via Pump.fun liquidity and is distributed directly to the community as people buy and trade.

The tokenomics below represent targets and goals for how the community, through the DAO, will organize usage of ASK over time:

- Education Initiatives (DAO-Driven) – 50%
- Community & Rewards – 20%
- Liquidity & Listings – 20%
- Team & Development – 10%

Note: These are not insider holdings. They are community targets, to be achieved through growth, DAO voting, and organic distribution from the liquidity pool.

5. Roadmap

Phase 1 – ■ Plug In

- Token launch on Pump.fun
- Website + community hub
- Telegram Spin-to-Win Game live
- First 1,000 holders

Phase 2 – ■ Build the Current

- Community contests & events
- DAO voting begins for education allocations
- First education fund donation
- Expansion of partnerships

Phase 3 – ■ Full Power

- NFT integrations with Ai-Socket Robot art
- Exchange listings
- Growth of the global education fund
- And beyond... a new Web3 hub is coming — connecting meme coins and Web3 jobbers to fresh opportunities.

Ai-Socket Roadmap

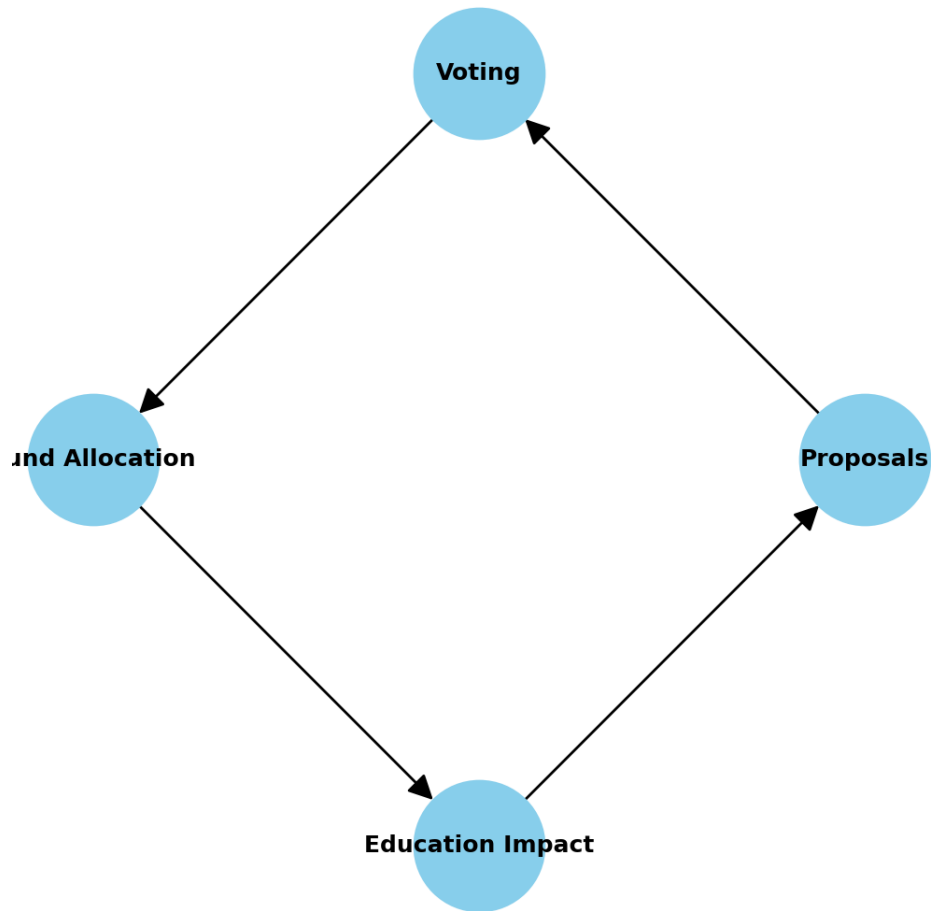

6. Governance Model (DAO)

The education fund is not controlled by a single wallet or founder. Instead, it's directed by the Ai-Socket DAO, giving the community power over where funds go.

- **Proposal Creation:** Any token holder can submit ideas for education projects or donations.
- **Voting:** ASK tokens grant voting rights. The more tokens held, the more influence in shaping initiatives.
- **Transparency:** All decisions and fund flows are public and verifiable on-chain.

This ensures Ai-Socket stays true to its mission: funding education through community power.

7. Closing

Ai-Socket is more than a meme coin. It's energy + purpose + community, with half its supply fueling education and the rest powering growth, fun, and innovation.

We are building something bigger than a token — we're building a movement.
